NASA SEWP VI
ORDERING GUIDE
INSI CLOUD INC.

SEWP OVERVIEW

NASA SEWP VI (Solutions for Enterprise-Wide Procurement), pronounced “soup,” provides Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for Federal Agencies and their approved contractors. The SEWP vehicle supports Government acquisition of technology solutions and mission-focused services. NASA SEWP VI – The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support - more than 50,000 orders a year.

FAIR OPPORTUNITY

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding $10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP Quote Request Tool (QRT) will automatically include the Contract Holders within a selected Group or based on a suggested source

About INSI Cloud Inc.

Established in 2015, INSI Cloud Inc. is an SBA-certified 8(a) small business providing mission-focused technology, cybersecurity, cloud, quantum, artificial intelligence, and business operations services. INSI supports Federal, State, and Local Government customers with secure, scalable, and mission-aligned solutions.

ORDERING GUIDE
INSI CLOUD INC.

WHAT'S IN SCOPE FOR SEWP VI?

SEWP VI is designed to provide a broad suite of ITC/AV solutions and services. INSI Cloud's Category C service offerings may support mission-based Government requirements, subject to the scope and terms of the contract and the specific order.

Representative INSI Cloud capabilities include:

APABILITY	REPRESENTATIVE SERVICES
Artificial Intelligence	Strategic AI enablement; trusted and responsible AI; generative AI; AI-ready data architecture; conversational AI; smart automation.
Intelligent Cloud	Cloud strategy and architecture; legacy transformation and migration; cloud-native application advisory; hybrid cloud lifecycle management.
Modern Security	Zero Trust and identity; security architecture and resilience; AI-driven threat detection; cyber operations; DevSecOps; governance, risk, and compliance.
Quantum Technologies	Post-quantum cryptography; quantum-resilient network security; quantum infrastructure readiness; quantum computing and quantum AI solutions.
Business Operations	Program/project management; change management; grants and contract management; data analysis and reporting; HR support; hardware/software support; quality management systems.
Client Empowerment	Enterprise learning; custom curriculum and training delivery; immersive simulation environments; IT-enabled learning; organizational strategy and change enablement.

HOW TO REQUEST A QUOTE

Government customers may contact INSI Cloud to discuss a requirement and request a quotation. To help INSI prepare a responsive quote, customers should provide the statement of work or performance requirements, applicable technical specifications, quantities or labor requirements, delivery location, required period of performance, security requirements, and requested delivery date.

QUOTATION CONTACT

INSI Cloud Inc. | manik@insicloud.com | 609-365-1553 / 202-980-7111
For SEWP-specific procurement questions, customers may also use NASA SEWP Program Management Office resources and the SEWP Quote Request Tool, as appropriate to the issuing agency's acquisition process.

ORDERING PROCESS

The internal ordering process varies by agency. The issuing agency establishes its own procedures and forms for purchase requests (PRs), funding, competition, evaluation, award, and delivery orders (DOs). The typical process begins when an end user defines a requirement and prepares a purchase request.

The purchase request and any required funding information are routed through the agency's procurement office. The issuing agency's authorized contracting and procurement personnel are responsible for issuing the delivery order in accordance with applicable procedures. NASA SEWP Program Management Office processes, tracks, and routes orders as established by the SEWP program. INSI Cloud will support customers with information needed for an order under the applicable contract requirements.

Agency-specific requirements may apply to orders placed through an existing contract vehicle or Government-Wide Acquisition Contract. Contracting Officers and other agency personnel should follow their agency's internal policies and the applicable SEWP VI ordering instructions. Any order modifications must follow the required SEWP and issuing-agency procedures.

ORDER SUPPORT AND POST-DELIVERY SUPPORT

For awarded orders, INSI Cloud will provide support in accordance with the applicable contract, quotation, purchase order, delivery order, statement of work, and relevant product or service terms. Support may include order-status coordination, delivery coordination, implementation support, technical assistance, warranty coordination where applicable, and resolution of post-delivery issues.

TROUBLESHOOTING AN ORDER

Customers should contact INSI Cloud promptly when an order, delivery, product, service, or implementation issue is identified. INSI will coordinate with appropriate technical, program, vendor, or support personnel and track the issue through resolution. When contacting support, customers should provide the SEWP delivery-order number, purchase-order number, affected product or service, and a concise description of the issue.

CONTRACT VEHICLES

INSI Cloud's Government contract vehicles and identifiers include NASA SEWP VI, GSA MAS 47QTCA21D0023, and GSA 8(a) STARS III 47QTCB22D0407, CAGE 7PY61, and UEI H4YLDB9MFAK1.

ORDERING GUIDE MAINTENANCE

This Ordering Guide will be reviewed and updated as needed to reflect applicable contract modifications, current points of contact, ordering procedures, capabilities, and other information needed by SEWP customers. Customers should use the most current version available from INSI Cloud.
